

LAYERING BASICS FOR COLD WEATHER

Following the OMFS Layering System will help children and adults stay warm in the chilliest and wettest of conditions!

There's no such thing as bad weather - if you're dressed for it!

BASE LAYER

Base layers are the most important part of any layering system. Long underwear and socks can vary in weights depending on the weather. Choose synthetic or wool material - **never cotton**.

Down sweater & fleece pants

Wool sweater & nylon pants

MID LAYER

Mid layers help to create a pocket of warm air around the body. Material should always be based on the temperature, thicker mid layers for colder days. Again, cotton is not a good choice for a mid layer, think wool or fleece with nylon pants for warmer days. **Multiple mid layers can be used when the conditions are cold.*

OUTER LAYER

The Outer layer is responsible for keeping the elements out and warmth in! At Forest School it is essential that this layer is waterproof on both the top and bottom, even when dry outside. If in a rain coat, on colder days, add another jacket for warmth.

Snow suit

Rain suit

HEAD, HANDS & FEET

Head - always wear or bring a winter toque, lighter weight toques can be used for warmer days.

Hands - while mini mitts are nice to have on hand for dexterity, winter mittens (not gloves) are needed for all days when temps below 5°C.

Feet - insulated rain boots are needed when temps are below 5°C. Winter boots should be used when the temp will stay below 0°C for the day.

EXTRAS

An extra sweater, pair of wool socks (suitable for the temperature), and up to 3 extra pairs of mittens should be in the pack at all times!

STAY WARM, LAYER UP!
